

Nurhana Bt Kamal

Nurhana Bt Kamal was suspected of having hearing loss since birth. Her parents only noticed it after 3 years later. They brought her to Hospital University Kebangsaan Malaysia for a checkup and were suggested to prescribe a Hearing Aid. After that, she went through a speech therapy for a year. 'I have learn how to communicate with my daughter and as the days go by, she has improved in her speech', said by her father Mr. Kamal.

Now she can hear very well with good sound quality. I am very glad that I found The Hearing Solution Company Sdn Bhd in year 2008. The audiologist in The Hearing Solution Company is very skillful in hearing assessment. He recommended a Hearing Aid according to my daughter's needs.

'At times, I can't even remember that my daughter is wearing a Hearing Aid,' said Mr. Kamal.

The Hearing Aid was great because she is now very active in her school time and can participate in all sorts of activities without having any major problem to the Hearing Aid. The Hearing Aid enable to hear or alert what is happening around her. Thanks to The Hearing Solution Company Sdn Bhd.
